BULLDOG GEN 2 SEAL

The Bulldog Gen2 Seal has all of the same features as the original Bulldog Seal but unlike the original this product has an updated design with an easy tear off between each seal so there are no scrap pieces of plastic. The seal is fixed length and manufactured from two dissimilar materials. The Acetyl insert is durable and will withstand freezing and boiling conditions, while the polypropylene body is flexible for easy use. The design includes rolled heat staking technology to secure the insert to the body which provides clear evidence of tampering if forced open or cut. There is a designated break off point for easy removal and simple tamper inspection. This seal is ideal for securing vehicle doors and fire doors but is also suitable for other sealing requirements.

Recommended Applications:

Airlines, Cargo Trailers, Containers, Rail freight, Refineries, Vehicles, Fire doors, Lockers, Grain hoppers, and Game tags.

Materials:

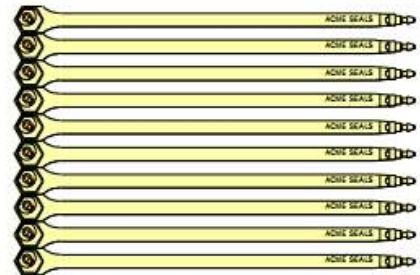

Body: Polypropylene with UV & Biodegradable additives

Insert: Acetyl with Biodegradable additives.

Operating Lengths: 19cm (overall 21cm)

Strap Width: 7mm

Average Breaking Strength: 20kg

Marking:

Laser or Foil marking: Stock marked SECURED & Consecutively numbered

Optional custom marked with customer name and serial numbers

Colors: Red, blue, green, yellow, orange, black, white.

Packaging: 10/mat, 1000/box
